

Select your book size to see recommended PDF measurements

This page is for book-makers creating PDFs in applications other than Adobe InDesign. If you are an InDesign user, please use our [plug-in for Adobe InDesign](#).

Select your book size

Photo Books (including Layflat books)

- ☐ Mini Square 5x5 inches (13x13 cm)
- ☐ Small Square 7x7 inches (18x18 cm)
- ☐ Standard Portrait 8x10 inches (20x25 cm)
- ☐ Standard Landscape 10x8 inches (25x20 cm)
- ☒ Large Format Landscape 13x11 inches (33x28 cm)
- ☐ Large Square 12x12 inches (30x30 cm)

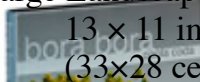

Trade Books

- ☐ 5x8 inches (13x20 cm)
- ☐ 6x9 inches (15x23 cm)
- ☐ 8x10 inches (20x25 cm)

Magazines

- ☐ Premium Magazine 8.5x11 inches (22x28 cm)

Large Landscape

 13 x 11 inches
(33x28 centimeters)

Getting Started [Specifications](#)

Your Book Specifications

Large Landscape

Hardcover, ImageWrap

Matte or lustre

100 pages

Page Specifications

	Inches
Final, exported PDF should measure (w x h)	12.625 x 10.875
Page size / trim line (w x h)	12.5 x 10.625
Bleed (top, bottom, and outside edges)	0.125
Inset for Margins / Safe boundary (Top, Bottom, Outside Edge)	0.25
Inset for Margins / Safe boundary (Binding Edge)	0.5

Cover Specifications

	Inches
Final, exported PDF should measure (w x h)	26.681 x 11.625
Total Page size / trim line (w x h)	26.069000000000003 x 11.013
Bleed (all edges)	0.306
Flaps (w x h, measured from trim edge to fold)	none
Gutter / Spine (w x h)	0.569 x 11.625
Inset for Margins / Safe boundary (from edge of trim)	0.25

If you have Adobe® InDesign®, use our [InDesign Plug-in](#) for a much easier workflow to make high quality PDF files.

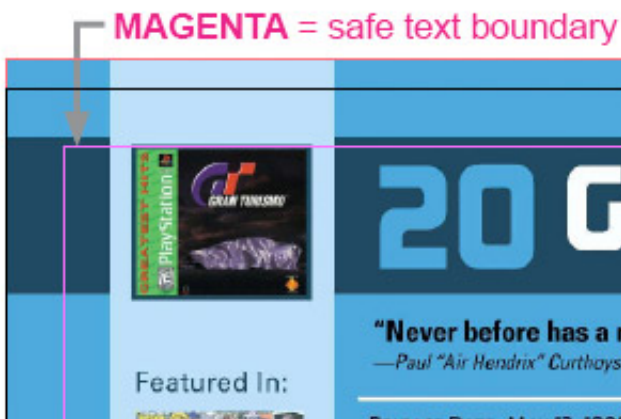

These printing considerations apply to your cover PDFs and your page PDFs:

Bleed — The bleed measurement when added to the trim size measurement will equal the final size of the PDFs that are required for successful upload and printing with Blurb. Any imagery or color that you would like to bleed off of the edge of your book pages or cover should be extended out past the trim by this bleed amount. Any text or images that appear in your design between the trim line and the bleed line will not actually print in your final book. Please note, that while bleed is added to all four sides of your covers, it is only added to the top, bottom, and outside of your individual page layout. The inside edge is the gutter of your book.

Trim — Trim size indicates where the cover or pages end and where the paper is cut to your specified book size. This is the finished size of your book after the bleed area has been trimmed. On the ImageWrap book, the trim line references where the image will be wrapped around the edge of the cover.

Safe text boundary — The safe text area is inset from the trim line by 18 pts (.25 in, 0.6 cm) on all outside edges and 45 pts (.625 in, 1.587 cm) for the gutter. This indicates where you can insert text and images and be sure that they will not be trimmed too close to the edge or bound into the gutter. Any and all critical content, like text, should be kept within the safe area. It is similar to defining a margin in word processing documents
